

Peak Technology Packages

Peak has teamed up with leading edge technology companies to provide you with a complete set of tools to help you manage your business, maintain compliance, and provide exceptional service to your clients. The following describes components and pricing of each package.

Peak Standard Package	\$ 150 Monthly
-----------------------	----------------

New Business Workflow

Primary Function:

Docupace is where Reps enter new business forms for review and approval. Stores all client forms.

Docupace is the industry's first web based SEC/FINRA compliant paperless processing system. Docupace's documents management and workflow solution simplifies the process of capturing, organizing, routing and accessing information to make your office more efficient by increasing turn around time and reducing errors.

Commissions

Primary Function:

Jaccomo provides Reps with access to Commission and Tax documents

jCore is a real-time commission reporting system that generates reports on demand or on a predetermined schedule and is shared with representatives via a simple link that will provide access to the commission detail.

Email Encryption, Social Media & Web Archiving

Primary Function:

Capture & Review Email and Social Media Content

Erado supports email from virtually all email platforms. It imports email and attachments in near-real time, meaning that users can access their archived messages via Erado Search almost instantly.

Peak Premium Packages **\$ 150 Standard + Optional Programs**

Practice Management

Primary Functions:

- Performance Reporting
- Account/Asset Aggregation
- Risk Management
- CRM
- Financial Planning
- Client Portal/Vault

- Advyzon is an all-inclusive, fully integrated practice management solution designed to be Command Central for your practice. It provides the tools you need to run your business on a single platform. The system is fully mobile and is accessible on any connected device.
- The client management tool provides an intuitive interface to manage your client relationships with robust client profile tools that allow for a holistic view of information.
- The financial planning module was designed using the CFP® Board six step process. You can produce client agreements and

investment policy statements.

- With the portfolio management and performance reporting module you can manage client accounts, groups and composites. Advyzon supports lot tracking, gain/loss and performance reporting, and fee billing. You have the ability to produce and distribute firm branded reports to your clients quickly and efficiently via the client portal.
- With data aggregation and business intelligence you can monitor and gain insight into your practice as well as identify trends and utilize alert capability.
